## Lithium Battery Caution:

The circuit board on this terminal is populated with a lithium battery to protect data or programs stored in the Random Access Memory (RAM). Do not, under any circumstances, attempt to replace the lithium battery in the terminal. Failure to comply may void your warranty. Battery replacement should be done by qualified personnel wearing the proper eye protection.
CAUTION: Danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instruction.

This product utilizes a battery that contains Perchlorate Material. Perchlorate Material - special handling may apply, See www.dtsc.ca.gov/hazardouswaste/perchlorate

## Before You Start!

## What's In the Box

- ATR240 Time Recorder
- (2) Clock Cover Keys
- 18vDC Switching Power Supply
- User Manual
- (25) Sample ATR241 Weekly Time Cards
- Clock Wall Mounting Template
(Also available for download at http://support.acroprint.com/)
- (2) Mounting Screws
- (2) Plastic Wall Anchors

1) Unpack clock. Inspect clock for any damages that may have occurred during shipment. Check box contents for any missing items. If any damages are found or if any parts are missing please contact Acroprint Customer Service at (800) 334-7190.
2) Connect the ATR240 power adapter and plug it into a wall outlet to turn the clock on.
3) If this is the first time you've turned the clock on, open the Ribbon Access Door with the key and, using a ball point pen, press the Reset button.

Do not attempt to service the ATR240 yourself. Disassembling the clock will void the warranty. Always follow the instructions in the user guide.

- Do not place the clock in direct sunlight as this could discolor the housing over time.
- The clock is designed for indoor use in a temperature range of $32-104^{\circ} \mathrm{F}\left(0-40^{\circ} \mathrm{C}\right)$. The clock is not waterproof or shockproof. Keep the clock away from heat sources such as radiators. Avoid dusty environments or exposure to chemicals.
- The clock may be placed upright on a solid surface or mounted to a wall with mounting screws. Use the enclosed template \& screws for wall mounting. Avoid locations where the device will be subject to vibrations and shock such as a slamming door.
- The clock warranty does not cover defects or damages caused by improper installation, improper storage, abuse, ordinary wear, or unauthorized service.

Time Recorder Mode Settings

| Mode | Setting | Values | Default Value |
| :---: | :---: | :---: | :---: |
| 01 | Year | 2000-2099 | Year of Mfg |
| 02 | Date | 1-12 Mo, 1-31 Date | 01, 01 |
| 03 | Time | 1-23 Hr, 0-59 Min | 12:00 |
| 04 | End of Day Change Time | 1-23 Hr, 0-59 Min | 00: 00 |
| 05 | Set Card Format <br> (Set "00" for ATR241 cards) | 00: first row blank <br> 01: prints on $1^{\text {st }}$ row | 00 |
| 06 | Pay Period Type *End Day of Wkly P.Period Must set 07 for Wkly Card | 00: Mthly, 01: Wkly 01=Mon...07=Sun | $\begin{aligned} & 01 \\ & 07 \end{aligned}$ |
| 07 | Clock Display Format | 12 or 24 Hr | 12 |

| 11 | Time Card Recognition Note: Turn "On" for Mthly cards | 00: On, 01: Off | 01 |

Note: Pressing "All-Reset" on the control panel will reset all Time Recorder settings to their factory defaults.

## Clock Overview

## Top View

## Front View

- Battery Status Indicator: A fully charged Battery will have (5) bars.
- DST Icon: displays when exiting programming mode when DST is turned on.
- Each blink of the colon is one sec.

## Rear View

## Initial Setup

## Setting Year

1. Remove top cover
a. Locate buttons at the top of the clock labeled P4, P5 and P6
i. P4 changes values down
ii. P5 changes values up
iii. P6 is used to save and select modes
2. Locate the Setup (programming) switch. Move the switch to the left position, you are now in setup mode
3. The mode indicator " 01 " will be flashing, press P 6 to select
4. Press P4 or P5 to select the current year
5. Press P6 to Save

## Setting Month/Date

6. The mode indicator " 02 " will be flashing, press P6 to select
7. Press P4 or P5 to select the current month
8. Press P6 to save
9. Press P4 or P5 to select the current date
10. Press P6 to save

## Setting Time

11. The mode indicator " 3 " will be flashing, press P6 to select
12. Press P4 or P5 to select the current hour
13. Press P6 to save
14. Press P4 or P5 to select the current minute
15. Press P6 to save

## Setting Day Advance Time

16. The mode indicator " 04 " will be flashing, press P6 to select
17. Complete steps 11-15

## Setting Pay Period

18. The mode indicator " 05 " will be flashing, press P5 to switch to mode " 06 "
19. The mode indicator " 06 " will be flashing, press P6 to select
20. Select the pay period type by pressing P4 or P5
a. If the pay period is monthly select 00
b. If the pay period is weekly select 01
21. Press P6 to save
22. To select the end of the weekly pay period you must select 07
23. Press P6 to save

## Setting Clock Display Format

24. The mode indicator " 07 " will be flashing, Press P6 to select
25. Press P4 or P5 to select the clock display format
a. You can choose between the 12 hour or 24 hour (military time) format
26. Press P6 to save

## Setting Start and End of DST

27. The mode indicator " 08 " will be flashing, press P5 to switch to mode "09"
28. The mode indicator "09" will be flashing, press P6 to select
29. Press P4 or P5 to select the correct month (US-March)
30. Press P6 to save
31. Press P4 or P5 to select the correct date
32. Press P6 to save
33. Press P4 or P5 to select the correct start time (US-2am)
34. Press P6 to save
35. Complete steps 29-34 to complete the set up for the end of DST

## Setting Print Format

36. The mode indicator " 10 " will be flashing, press P6 to select
37. Press P4 or P5 to select the correct print format
a. $00-24$ hour (Military Time)
b. 01 - Decimal Hours
c. $02-12$ hours (pm)
38. Press P6 to save

## Setting Time Card Recognition

39. The mode indicator "11" will be Flashing, press P6 to select
40. Press P4 or P5 to select the correct the correct time card format
a. 00 - Monthly, Semi-Monthly
b. 01 - Weekly, Bi-Weekly
41. Press P6 to save

Initial setup is complete. Locate the program switch and move it to the up position. Replace top cover.

## Setting Ink Color Change Times

Changing the ink color of a particular time interval can provide a visual aid to "highlight" a punch that is out of an acceptable range, for example, the punch of an employee that arrives later than an acceptable time will print in red. Or if the employee leaves earlier than is acceptable, the time will print in red.
Note that the current ink color is displayed in the lower left corner of the LCD Display (Red or Black).
Note: The clock allows for up to (6) time slots (ranges).

1. Enter Setup mode.
2. Press [P1].
3. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to select the Time Slot ( 01 to 06 )

Note: If this is your first setup, you have to start from
Slot 01. You have to add Slots in order, i.e., Slot 01,
Slot 02........Slot 06. You cannot skip Slots.
4. Press [P6]. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to change the Ink Change hour.
5. Press [P6]. Press [P4 $]$ ] or $[P 5 \uparrow]$ to change the Ink Change minute.
6. Press [P6]. Press [P5 $\uparrow$ ] to change the Ink Change color:

01=Black, 02=Red
By default, the Ink Change settings will apply to all days of the week. Sun (day 07) will be the current day selected. If you want to deselect a day, press [P4ฟ] or [P5 $[$ ] to select the day (it will begin flashing) then press [P1] to deselect the day. The icon for the day will disappear. Repeat this step to deselect any other days. To add a day back, follow the same steps and the icon will re-appear.
7. Press [P6]. Repeat steps for any remaining time slots.

Press $[\mathrm{P} 4 \downarrow]$ or $[\mathrm{P} 5 \uparrow]$ to continue with other settings or move Setup switch to the upper position to exit Setup mode.
Note: When the time advances to the Ink Color Change Time, the print head will move from side to side and the LCD display will change to display the new current Ink Color setting.

## Alarm Settings

You can set up to (6) alarms to activate each day or you can set each alarm to only activate on certain days of the week. Also you can set each alarm to sound the internal alarm, the external alarm, or both. You can set the alarm duration from 1 sec . up to $4 \mathrm{~min} \& 59 \mathrm{sec}$. The internal alarm volume can be adjusted via the volume screw but note that it will affect all sounds from the clock's speaker. The volume is adjustable from 0 to 102 decibels.

To Set an Alarm:

1. Enter Setup mode.
2. Press [P2].
3. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to select the Alarm time slot:

Available Slots: $01,02,03,04,05,06$
Note: alarm slots must be set starting with Slot 01 first. Additional alarm slots must be added in order. You cannot skip an alarm slot.
4. Press [P6]. Press [P4 $\downarrow$ ] or [P5 $\uparrow$ ] to change the Alarm hour.
5. Press [P6]. Press [P4 $[\mathrm{l}$ or $[\mathrm{P} 5 \uparrow]$ to change the Alarm min.
6. Press [P6]. Press [P4 ] or [P5 $[$ ] to change the Alarm type: 01=Internal, 02=External, 03=Both
7. Press [P6]. Press [P4 $[\mathrm{l}$ or $[\mathrm{P} 5 \uparrow]$ to change the alarm duration minutes.
8. Press [P6]. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to change the alarm duration seconds.
9. Press [P6].

By default, the current Alarm slot will apply to all days of the week. If you want to deselect a day, press [P4 4$]$ or [P5 $\uparrow$ ] to select the day (the day selected will begin flashing) then press [P2] to deselect the day. The icon for the day will disappear. Repeat this step to deselect any other days. To add a day back, follow the same steps and the icon will re-appear.
10. Press [P6] to save the Alarm settings for the current slot. Repeat steps for any remaining time slots or move the Setup switch to the upper position to exit Setup mode.
See "Connecting External Signal Devices" (pg. 16) for instructions on how to connect bells, horns or buzzers.

## Column Change Times

The column change settings allow you to program when the clock will begin printing in a different column on the time card. This could allow you to set the columns for start of shift, out for lunch, in from lunch, end of shift, start of OT, end of OT. This is just one example of how you can use this setting. When a column change time is reached the column indicator light will advance to the next column automatically.
The ATR240 allows for a maximum 99 column changes per day. In reality the most changes you would probably ever need would be 3 shifts $\times 6$ column changes per shift $=18$ column changes per day.

## To Set Column Changes:

1. Enter Setup mode.
2. Press [P3]. Press [P4 $\downarrow$ ] or [P5 $\uparrow$ ] to select the Column Change time slot. Note: if this is your first setup you will have to start from Slot 1 (the slot number will be flashing). Additional Column Change time slots must be added in order. You cannot skip a time slot.
3. Press [P6]. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to change the hour.
4. Press $[P 6]$. Press $[P 4 \downarrow]$ or $[P 5 \uparrow]$ to change the min.
5. Press [P6]. Press [P4 $\downarrow$ ] or [P5 $\uparrow$ ] to change the Column.
6. Press [P6] to set which days the column change is effective for.

By default, the current Column Change will apply to all days of the week. If you want to deselect a day, press [P4 $\downarrow$ ] or [P5 $\uparrow$ ] to highlight the day (the day selected will begin flashing), then Press [P3] to deselect the day. The icon for the day will disappear. Repeat this step to deselect any other days. To add a day back, follow the same step and the icon will re-appear.
You can manually override the current column setting at any time. When the next column change occurs the clock will return to the automated column selection. If you want to change back to the current auto column selection you will need to manually select it.

## Features and Specifications

Clock Features

| Display Language | English |
| :--- | :--- |
| Operation Mode | Stand-alone (No PC Interface) |
| Operational Battery Backup | Optional |
| Auto Card Feeder | Yes |
| Printing Method | 9 -Pin Dot Matrix |
| Two Color Printing | Yes |
| Perpetual Calendar | Yes |
| Auto Fix Positioning | Yes |
| Power Failure Printing | Yes |
| Power Failure Memory Retention | Yes |
| Display Format | 12 or 24 hour |
| Print Format | 12 hr, 24 hr, decimal time |
| External Alarm | Connection Available |
| Auto Column Changing | Yes |
| Compatible with Wkly Time Card | Yes (Card Recognition Off) |
| Card Recognition (front/back) | Yes |

## Clock Specifications

Miscellaneous

| Input Voltage | DC 18v |
| :--- | :---: |
| Input Current | 1.5 A |
| Anti-static Strength | $<15 \mathrm{KV}$ |

| Operational Temperature | $0-40^{\circ} \mathrm{C}\left(32-104^{\circ} \mathrm{F}\right)$ |
| Storage Relative Humidity | $10-80 \%$ |
| Storage Temperature | $-10-60^{\circ} \mathrm{C}\left(14-140^{\circ} \mathrm{F}\right)$ |
| Dimensions (Clock) | $196(\mathrm{w}) \times 239(\mathrm{~h}) \times 126(\mathrm{~d}) \mathrm{mm}$ |
| Dimensions (Boxed) | $266(\mathrm{w}) \times 283(\mathrm{~h}) \times 208(\mathrm{~d}) \mathrm{mm}$ |
| Weight (Clock Only) | 4.0 Lb |
| Weight (Boxed) | 5.6 Lb |
| Operational Battery Pack Wt. | 0.7 Lb |
| Time Card Dimension | $185 \mathrm{~mm} \mathrm{~L} \mathrm{x} \mathrm{86mm} \mathrm{~W}$ |
| Time Card Weight | $300 \#$ |
| Circuit Board Battery | $\mathrm{CR2032}(2 \mathrm{yr} \mathrm{life)}$ |

## Ribbon Life

The ATR242 ribbon (39-0135-000) will typically last 3 months with 50 employees punching 6 times per day ( $\sim 18,000$ punches). Actual ribbon life will vary based on the number of punches, humidity, temperature, exposure to air.

## Operational Battery Pack

The optional operational battery pack (58-0114-000) is a 12 cell NiMH (Nickel Metal Hydride) battery pack that recharges when the ATR240 is plugged in. In the event of a power failure the clock will instantly switch to battery power without any interruption in service. The operational battery pack allows for full operation of the clock. The LCD backlight is not activated when the clock is running on battery power as a power saving feature, however the LCD display is plainly visible in a lighted room.

Battery Pack Specs:
Voltage: DC 14.4v
Capacity: 1800mA
Standby mode: 30-36hr reserve power
Fully charged: 5 days use ( 300 punches/day)
Note: Actual battery life depends on many factors such as battery age, temperature, discharge history, etc., and can vary greatly depending on these factors.
The ATR240 should be plugged in for 12 hours to fully charge the battery pack.
For more information see "Installing the Operational Battery Pack" in the Appendix.

## Warning:

Batteries may leak, overheat, catch fire or explode if proper safety \& handling procedures are not followed:

- DO NOT get batteries wet
- DO NOT place batteries near heat sources
- DO NOT use any power supply other than the original one supplied with the time recorder.
- DO NOT inverse polarity connection
- NEVER throw batteries into fire. Properly dispose of batteries according to local rules and regulations.
- DO NOT allow anything to short circuit the batteries
- Dropping a battery may damage the battery. Replace the battery if you suspect any damage.

Internal View
(Internal Control Panel)

## Re-setting Time Recorder to Factory Defaults

The "All-Reset" button on the internal control panel resets Time Recorder settings such as date, time, print/display formats, to the factory defaults. See chart for factory defaults. Note: The button is recessed to prevent accidentally resetting the Time Recorder settings. Use the point of a pen or paperclip to access the button. It will take approximately 9 seconds to complete the reset.

## Troubleshooting

| Symptom | Possible Problem | Solution |
| :--- | :--- | :--- |
| Clock does <br> not power on | Power Outage | Check circuit breaker. Wait for power to be <br> restored |
|  | The power source was not properly <br> connected | Check the connections of the power supply <br> and/or backup battery |
| The time is <br> incorrect | The time was not set correctly. | Set correct time |
|  | Prolonged power outage. | Set time after power is restored |
| The clock <br> keeps losing <br> time | The coin cell battery on the <br> motherboard needs to be replaced. | Replace the coin cell on the motherboard. |
| Display Off, <br> Clock has <br> Power | Defective Motherboard | Defective LCD display |
|  | Contact Local Dealer or Acroprint for repair |  |
| The date is <br> incorrect | The date was not set correctly | Set correct date |
| Clock beeps <br> and rejects <br> time card | Wrong side of card is inserted <br> (monthly card) | Flip card over and re-insert |
|  | Incompatible time card | Use card approved for the ATR240 |
| Print too light | Ribbon cassette not properly seated. | Remove and re-insert ribbon cassette <br> correctly |
|  | The print ribbon is dried out | Replace ribbon cassette |
|  | Wrong column selected (manually <br> selected) or column change time set <br> incorrectly. | Select the correct column (P1 - P6) or set the <br> correct column change time |

| Symptom | Possible Problem | Solution |
| :--- | :--- | :--- |
| Punches print <br> on wrong row | The End of Day set incorrectly | Set End of Day correctly |
|  | Time Card Format set incorrectly | Set Time Card Format correctly |
|  | Pay period type is set incorrectly | Set Pay Period type correctly |
| Display is in <br> AM/PM hours <br> but clock <br> prints in 24Hr <br> format | The clock display format and print <br> format are independent. You must <br> make sure each is set correctly. | Set the display format correctly <br> Set the print format correctly |
| Clock is <br> printing in <br> wrong color | Ink Color Change Time set <br> incorrectly | Set the Ink Color Change Time correctly |
| Clock print <br> location is a <br> little off | Clock printing position needs to be <br> adjusted. | Adjust the clock print position |
| Print <br> registration is <br> faint or not <br> visible at all | Ribbon cassette not firmly seated. | Press down firmly on ribbon cassette until it <br> clicks into place. |
|  | Turn ribbon advance knob clockwise. If <br> ribbon will not advance remove cassette and <br> try advancing again. If ribbon won't advance <br> replace ribbon. |  |

## Frequently Asked Questions

1. Q: The display does not work or parts of it do not work.

A: Possible Causes:
a. Motherboard is defective
b. The LCD display is defective.

Correction: Contact your local dealer or Acroprint for repair.
2. Q: Can my clock calculate the pay period total?

A: No. The ATR240 does not offer time total calculation.
3. Q: Why does the clock keep rejecting the time card?

A: Check to see if the correct side of the Time Card is inserted. If Time Card Recognition is turned on your Monthly Time Card must be inserted with the current date on the front side. If you are using a Weekly Time Card make sure Time Card Recognition is turned off.
4. Q: Why didn't the time recorder setting I changed not work?

A: Make sure you press [P6] after you enter your setting.
5. Q : Why is my clock printing on the wrong row?

A: - Make sure the date is set correctly.

- Make sure the "End of Day" time is set correctly.
- For Weekly pay periods make sure the "End Day of Pay Period" is set correctly.
- Make sure the Pay Period type is is set correctly.

For more info on troubleshooting or general "how to" info go to:

## http:/Isupport.acroprint.com

## Maintenance

## Replacing the Ribbon Cassette

1. Open clock cover. Press [P3] to move the print head to the center of the clock so that the ribbon cassette can be more easily accessed.
2. Pull the ribbon holder tabs towards you to unlock the ribbon cassette and use the handle on top of the ribbon to pull the cassette out.
3. Insert replacement ribbon. Make sure to feed the ribbon over the black ribbon guide and slide the ribbon down between the guide and the silver print shield. Push the ribbon down until it clicks into place. Turn the ribbon knob clockwise to remove any slack in the ribbon.

## Replacing the Circuit Board Batteries

The ATR240 is equipped with (1) CR2032 3v Lithium Coin Cell battery on the Main board. The battery should last approximately 1.5 to 2 years under normal operating conditions. Do not attempt to replace the battery as it will void your warranty. If your clock is already out of warranty you can attempt to replace the batteries yourself but note that you could damage the board if you short out any components on the circuit board. Avoid using metal objects to remove the batteries.
Note: all Time Recorder settings will be reset to factory defaults as soon as the Main board battery is removed.

Back Case

1. Unplug clock.
2. Remove the front cover and the two screws that connect the front and back case. Remove the front case and lay it flat being careful not to pull any wires or cables loose.
3. To remove batteries press the metal retaining clip away from the battery. The battery should pop up. It may be necessary to use a small probe to pop the battery out.
4. Replace the batteries and re-assemble clock.

## Installing the Operational Battery Pack

First unplug the clock. The door to the battery pack compartment is located on the bottom edge of the back of the clock. Remove the screw that secures the door. The door may be tightly fitted. Insert a thin knife blade under the bottom of the door at the screw end and rotate the blade to open the door.

Connect the battery cable to the connector on the left side of the compartment. Note that the two ridges on the side of the battery connector should be facing down to line up with the slots in the clock's power connector. Turn the battery so that the cable connection is on the bottom. Insert the battery pack into the clock with the wires inserted into the opening in the side of the compartment. This is important since the battery door can't be attached if the battery is sitting on top of the wires. You may need to use something like a pencil or ruler to push the wires into the opening. Attach the door by inserting the door tabs into the left side of the compartment and firmly rotating the door into place. If the door won't close check to make sure the wires aren't under the battery. Plug in the power supply once the battery door is secure. The ATR240 should be plugged in for 12 hours to fully charge the battery pack.

## Cleaning the ATR240

Do not use cleaning products that contain alcohol or other strong chemicals as they could discolor or crack the terminal housing. Use a soft damp cloth to remove dirt. Wipe dry.

## Appendix

## Connecting External Signal Devices (Bells \& Horns)

The connections for an external signal device (bells, horns, buzzers, chimes, etc.), are made via a 2-wire Green terminal block on the back of the clock above the power jack. Connections are made by pressing the orange wire release tabs below each wire hole, fully inserting the wire and releasing the clip. Gently pull on the wires to make sure they are firmly secured in the terminal block.

Clock Back Housing, Lower Left Corner

In order to use a bell or horn a relay is required. Please call Acroprint or your Dealer to order the relay (PN 01-0230-000).
When a signal is activated by the clock the internal contacts of the relay close and complete the circuit. These internal contacts are "dry" and supply no voltage. Voltage applied to these contacts must not exceed 30 volts. The relay then activates the 120 v external signal device such as:

65-0103-000 "Grille Horn"
65-0104-000 "4-1/4" Bell"
65-0105-000 "8" Bell"
For more information about connecting an external signal device using a relay go to http://support.acroprint.com

Under "Time Clocks \& Document Stamps" click on "ATR240 Time Clock" and download 06-0346-000 "Connecting an External Signal Device."

## Wall Mounting Instructions

The ATR240 can be placed on a table or desk and it can also be mounted to a wall. A mounting template is included with the documents for the ATR240. If you misplace the template you can download it at:

## http://support.acroprint.com

Under "Time Clocks \& Document Stamps", click on "ATR240 Time Clock". Follow the instructions on the template to mount the clock.

## Supplies, Parts \& Accessories

| Part\# | Description |
| :---: | :--- |
| $01-0230-000$ | 24 Volt Switching Relay Kit |
